

BE ALERT! THE RANSOMWARE EPIDEMIC, BY THE NUMBERS ■

Source: Datto's 2016 Ransomware Report, with survey findings gathered from 1,100 IT service providers in the US and worldwide.

According to nearly 100% of IT service providers surveyed, ransomware attacks against small businesses are becoming more frequent, a trend that will continue over the next 2 years.

95%

REPORT CRYPTOLOCKER ATTACKS

Less than 1 in 4 ransomware incidents are reported to the authorities

The Leading Industries Targeted by Ransomware

35% report ransomware attack on cloud-based applications, including Google Apps and Office 365.

70% of whom report Dropbox being the target.

Ransomware outsmarts today's leading defense solutions:

93% report ransomware infiltrating anti-virus or anti-malware software

With a backup and disaster recovery (BDR) solution, 97% of small businesses could recover from ransomware. Without BDR, only 68% could recover.
